

Caltta e600

Caltta eChat utilizes the carrier's 3G/4G/5G/Wi-Fi infrastructure to provide wide coverage and unlimited channels to free customers from the small coverage and limited capacity of traditional PMR networks.

For more information about the price and license, please contact us at the email address contact.airadionet@airadio.com

LINX mobile features

Push-to-Talk — Instantly reach contacts, groups or your entire team with the touch of a button for professional two-way communication.

Record Calls — Calls on the network are saved & stored similar to voicemail for future playback.

Locate Your Team — Team presence & GPS allows you to view where your group members are located in relation to yourself on a live map.

Send Texts & Files — Instant messaging & image/video file transfers keep you in touch when voice calls aren't convenient. Texts read aloud for hands-free situations.

Worker Safety — Built-in SOS buttons, Man Down/Lone Worker security features, & the CYRN wearable panic button for location based emergency alerts with indoor positioning. Positions are traced with BLE beacon connections.

Real-Time Updates — Command & controlled updates from central managing dashboard: enable/disable units, notify teams of changes, add members to groups, & activate features instantly.

Task Management & Guard Tour — Users receive notifications when a new task is assigned to them; then they can view or update status for all assigned tasks in a simple mobile dashboard. Scan QR code checkpoints for Guard Tour.

NEW! Live Video & Full Duplex Voice — Initiate and receive video calls and full-duplex voice calls mobile-to-mobile or mobile-to-dispatcher.

NEW! LINX Push-to-Translate — Translate any text into **133 languages** of your choice in the Messages or Task Management modules, now with **TEXT-TO-SPEECH**.
